

THOMAS E. OGIATOR

Senior Frontend Engineer

Lagos, Nigeria | thomasogiator@gmail.com | +234 816 331 8717 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 4+ years building production web applications across fintech, e-commerce, and SaaS platforms using React, Next.js, and TypeScript. I work across the full frontend lifecycle, from architecture and component design to performance tuning and shipping, and I'm comfortable influencing product decisions, not just implementing them. I've reduced initial load times by 30%, maintained 90%+ test coverage on critical user flows, and built interfaces handling real-time data without compromising on performance or reliability.

TECHNICAL SKILLS

- **Core Stack:** React.js, Next.js, TypeScript, JavaScript (ES2024), HTML5, CSS3
- **Styling & UI:** Tailwind CSS, shadcn/ui, Radix UI, Material UI, Bootstrap, Storybook, SCSS
- **State & Data:** Redux Toolkit, RTK Query, Zustand, TanStack Query, Axios
- **Real-Time & APIs:** WebSockets (Socket.io), RESTful APIs, GraphQL, Paystack, Korapay, Firebase
- **Testing & Quality:** Jest, React Testing Library, Cypress, CI/CD, Code Reviews
- **Performance & Web:** Code splitting, lazy loading, Core Web Vitals, SSR/SSG, SEO, a11y (WCAG 2.1)
- **Cloud & Tooling:** AWS (S3, IAM, deployment), Git, GitHub, Webpack, Babel, Vite, Agile/Scrum
- **Engineering Practices:** Frontend architecture, component design systems, cross browser compatibility.

WORK EXPERIENCE

Frontend Engineer

September 2025 – Present

Zojatech – Zojapay (Fintech platform)

Lagos, Nigeria

React.js · TypeScript · Redux Toolkit · Tailwind CSS · RTK Query · REST APIs

- Took ownership of the Zojapay dashboard frontend, implementing new features, resolving bugs, and refining the UI while maintaining consistency with the existing architecture.
- Collaborated with backend, design, PM, and QA to define user flows and data presentation for new features, influencing how information is structured and surfaced across the dashboard.
- Integrated financial APIs with reliable error handling and loading state patterns, ensuring consistent UI behaviour during failures or latency spikes on data-sensitive screens.
- Improved performance and visual consistency on data-heavy views through targeted optimizations and component-level refinements.
- Designed and maintained reusable component libraries that standardized UI patterns across the platform, improving maintainability and accelerating feature development.

Frontend Engineer

January 2022 – August 2025

GIG Logistics – Alpha shop (E-commerce platform)

Lagos, Nigeria

React.js · JavaScript · Redux Toolkit · RTK Query · Jest · React Testing Library

- Co-led Alpha Shop frontend from zero to production, e-commerce platform with cart, real-time order tracking, and multi-gateway payments (Paystack, Korapay), contributing to a 15% post-launch revenue increase.
- Achieved 30% reduction in page load time via route-level code splitting, lazy loading, and RTK Query caching; improved Core Web Vitals scores across key conversion pages.
- Established 90%+ test coverage on critical flows (checkout, auth, order management) using Jest and React Testing Library.
- Collaborated with designers, backend developers, and product managers in Agile sprints to deliver features on time and meet evolving business needs.

SELECTED PROJECTS

HireMe (Talent Marketplace) · In development

Frontend Engineer | *React.js · TypeScript · Socket.io · Redux Toolkit · RTK Query · Tailwind CSS*

- Architecting and building a full-scale Talent Marketplace SaaS platform from scratch as a solo frontend engineer, comprising three distinct interface layers - a candidate-facing portal, an employer-facing portal, and a comprehensive admin dashboard - each with separate authentication, routing, and access-control logic.
- Employer portal features: candidate discovery and profile browsing (with portfolio video, skills, project history, and ratings), job creation and management, profile management, and real-time chat with candidates.
- Candidate portal features: job search and filtering, application and save workflows, profile and portfolio management (skills, video uploads, project showcases), and real-time chat with employers who initiate conversation.
- Implemented a real-time bidirectional chat system using WebSockets (Socket.io) enabling live employer-candidate messaging - handling connection lifecycle, room management, message delivery states, and graceful reconnection logic entirely on the frontend.
- Admin dashboard features: platform analytics overview, user management, content moderation, support ticket management, promotions, customer management, and configuration settings - architected as a modular, permission-aware interface.

Zojapay (Fintech SaaS Platform) <https://zojapay.com>

Frontend Engineer | *React.js · TypeScript · Redux Toolkit · RTK Query · Tailwind CSS*

- Contributed to the frontend of Zojapay's admin dashboard — a financial operations platform for transaction monitoring, compliance management, and operational reporting — implementing new features, UI improvements, and bug fixes across the dashboard.
- Integrated financial REST APIs with structured error handling, loading states, and retry logic to ensure reliable UI behaviour during API failures on data-sensitive screens.

StoreToLet (Multi-Tenant E-Commerce SaaS) <https://www.storetolet.com>

Frontend Engineer | *React.js · Next.js · TypeScript · Redux Toolkit (RTK Query) · Tailwind CSS · Paystack*

- Built the merchant-facing admin dashboard and customer-facing storefront portals for a multi-tenant SaaS platform, architecting shared component logic that scaled across independent merchant stores.
- Integrated Paystack payment gateway and cart/checkout flows on the customer portal, with real-world deployment to production merchant storefronts (e.g., daisyluxeskin.storetolet.com).
- Ensured cross-browser compatibility, responsive behaviour across devices, and consistent UI performance through systematic testing and optimised network request patterns via RTK Query caching.

Alpha shop (E-Commerce Platform) <https://shoponalpha.com>

Frontend Engineer | *React.js · JavaScript · Paystack · Korapay*

- Built the complete customer-facing shopping experience including product search with unique alpha codes, real-time order tracking, cart management, and dual payment gateway integration (Paystack and Korapay).

EDUCATION

Bachelor of Science – Microbiology
University of Lagos

Lagos, Nigeria

CERTIFICATIONS

AWS Cloud Practitioner - AWS
Frontend Web Development – EdYoda Digital University

August 2022
October 2021
